

Discover EEMUA e-learning

EEMUA e-learning offers short, awareness-level online courses that help engineers, technicians and other industry professionals build practical knowledge across industrial engineering, asset integrity, efficiency and safe operation. Modules can be completed at a time and pace that suits the learner.

What you can expect

Built for Industry

Learn from content shaped by EEMUA guidance, industry experience and the practical needs of engineers and technicians working across industrial environments.

Flexible Learning

Complete short, awareness-level modules at your own pace, making it easier to fit learning around work and other commitments.

Professional Development

Build knowledge across key engineering topics while supporting ongoing learning, competence and progression to further EEMUA training.

Practical, industry-led e-learning to build knowledge, confidence and competence.

Explore the Full Course Range

Discover all 16 awareness-level e-learning courses covering key areas of industrial safety, asset integrity, storage, control and specialist engineering topics.

Asset Integrity

Covers:

Hydrogen Production, Storage and Distribution; Mechanical Integrity; Pressure Systems; Pressure Testing; Subsea Materials; The Hazards of Hydrogen in Industrial Applications; Third Party Inspection.

Storage Tanks

Covers:

Opslagtanks; Plastic Tanks; Refrigerated Liquefied Gas Storage Tanks; Storage Tanks.

Instrumentation, Control & Cyber Security

Covers:

Alarm Systems; Control Rooms; Cyber Security; Functional Safety.

Leadership

Covers:

Process Safety Management.

Find the right course for you and start learning today.

Develop Your Knowledge with EEMUA

EEMUA e-learning provides an awareness-level starting point, helping learners build foundational knowledge before progressing into more advanced training and competency development.

Awareness

Start with EEMUA e-learning to build introductory knowledge in key engineering topics and establish a strong foundation for further learning.

Basic Application

Progress into more in-depth blended online training focused on applying EEMUA guidance in practice on a day-to-day basis.

Practitioner

Progress to specialist training and higher-level competency for experienced professionals with greater responsibility for making and contributing to key decisions.

soe

CPD APPROVED TRAINING

Benefits of EEMUA e-learning

- ✓ Gain CPD/PDH credits for your professional development
- ✓ Build practical engineering knowledge
- ✓ Strengthen onboarding and role transitions
- ✓ Learn flexibly around work commitments
- ✓ A pathway to further EEMUA learning
- ✓ Receive a certificate on successfully passing the end-of-course assessment

Designed for Industry Professionals

Suitable for engineers, technicians, operators and managers looking to strengthen their knowledge, support ongoing development or move into new functional areas within industry.
