

Corporate Membership

"We have been representing users' interests since 1950. Founded by some of the biggest names in industry, the Association was and still is regarded as an essential means of keeping abreast of a changing regulatory environment, and ensuring capital assets are operated safely, efficiently and effectively in a world where technologies and economies are transforming.

EEMUA has been at the forefront of establishing good practice across a range of industries and technical disciplines; from tank storage to alarm management, from working in hazardous areas to ensuring the integrity of ageing plant, demonstrating its members' involvement in tackling the issues of the day. Our Technical Committees and Forums provide a range of opportunities for your technical experts to maintain and extend their technical competence through interaction with their peers. Being involved in the development of good practice guidance can help your organisation be a leader in the field of industrial asset management – helping to put together the methodologies that will be used by the users of industrial assets for the next seventy years.

Join EEMUA and gain access to a non-competitive network for you to share experiences and build relationships, across a diverse range of industries."

Dr Stefan Kukula,
Chief Executive

About EEMUA

EEMUA is a non-profit membership organisation representing companies that are significant purchasers and users of engineering equipment and materials of construction.

Our members invariably operate industrial establishments or assets with safety-critical operations and cover facilities like process plants, power stations, offshore platforms, storage terminals, energy, utility transport, distribution systems and other engineering assets around the world.

In fact, our members own or operate many of the UK upper-tier COMAH (Control of Major Accident Hazards) and/or European SEVESO establishments.

Due to our cross-sector, cross-industry approach, member companies gain more influence when dealing with the regulator as the Association is not seen as a representative for one single industry, but a representative for industry as a whole.

We focus our efforts on the most critical issues for owners and operators, helping them maintain the right balance of in-house engineering expertise, stay abreast of a broad and increasingly complex regulatory landscape and operate their capital assets efficiently, effectively and in compliance with relevant legislation, regulation and standard.

One of EEMUA's many benefits as an interactive and collaborative organisation is diversity; members can draw on the experiences and practices of engineering equipment users from other organisations, operating sites and countries – from a range of industry sectors.

Membership spans multiple sectors and technical activities, covering the full scope of industrial asset management.

Benefits of membership

Professional Development

Participate in consultation on new regulations and the development of best practice guidance.

EEMUA provides excellent opportunities for continuous personal and professional development at all levels by means of EEMUA events, webinars and e-learning.

Knowledge and experience of engineering staff is widened through participation in EEMUA's Technical Committees, Forums training and competency courses and events.

Influence

Members enjoy the collective influence of a strong alliance of leading national and global companies – the voice of an established body of equipment users.

Our strong reputation means EEMUA works with and is approached by regulatory authorities such as the HSE, government departments and other bodies to discuss issues in a collective fashion rarely possible with individual companies.

Industry Awareness

Access to information services include news on EEMUA activities and a digest of national, European and international events specifically tailored to the engineering and operational interests of our members.

Your staff can register to receive our weekly news alerts, quarterly newsletter, documents and other updates, as well as receiving access to the members' area of our website.

Governance and oversight

Council

The EEMUA Council, in collaboration with the Board of Directors, reviews and determines the strategic direction of the Association and the content of the work programme. Council members are the first to learn about the initiatives and activities that EEMUA lead, focusing on the key challenges for our Members. Council meetings are an opportunity for Member representatives to set the direction for the Association, bringing the resources and experience of the organisation to bear on issues of concern to them. EEMUA focusses on practical, pragmatic approaches that can be immediately applied, a direct return on members investment of time and money. Each member company can have a representative on council.

Board of Directors

While the Council sets the overall direction and policy for the association, it also appoints members to the EEMUA Board, comprising both non-executive directors and EEMUA's senior executives. The board has both governance and leadership roles.

Enhanced Asset Management

Achieve the best combination of operational efficiency and effectiveness, safety and risk management, and environmental protection for your company by active participation in EEMUA work programmes.

Manage your assets more effectively to lead development of good practice and protect company interests.

Improve your corporate social responsibility profile with increased transparency and demonstrable contributions towards safety and best practices for industry and wider audiences.

Preferential rates and complimentary access

Complimentary access to all digital/PDF versions of EEMUA Publications.

A complimentary hardcopy of each new EEMUA Publication, including each new Edition, at time of publication.

Discounts on further hardcopies of EEMUA publications.

Free attendance to EEMUA seminars and a significantly subsidised rate for attendance to EEMUA Conference.

Discounts on our highly-acclaimed EEMUA industry training and competency courses.

Free access to e-learning and webinars.

Networking and Collaboration

EEMUA Technical Committees, Forums, Working Groups, projects and special events provide a non-competitive network for you to share experiences and build relationships with other companies across a diverse range of industries.

An essential part of EEMUA's methodology for producing publications; the core output of the organisation. These documents are industry guides and other publications, which promote good and best practices.

Represent EEMUA on national and international standards bodies such as BSI, ISO and IEC – all at no extra cost.

Our Technical Programme

Members are able to nominate employees for participation in any and all of EEMUA's Technical Committees, Forums and Working Groups.

Technical Committees

Electrical Committee (ELC)
Inspection and NDT Technology Committee (INT)
Instrumentation and Control Committee (INC)
Machinery Committee (MAC)
Materials Technology Committee (MTC)
On-line Analysers Committee (OLA)
Piping Systems and Pressure Vessels Committee (PSC-PRV)
Pressure Relieving Safety Systems (PRS)
Storage Tanks Committee (STC)
User Inspectorate Committee (UIC)

Forums

Ageing Assets Forum (AAF)
Asset Management Forum (AMF)
Competence and Training Forum (CTF)
Cyber Security Forum (CSF)
High Temperature Hydrogen Attack Forum (HTHAF)
Hydrofluoric Acid Forum (HFA)
Personal Portable Devices Forum (P2F)
Structural and Civil Engineering Forum (SCE)
Underground Cavern (Gas) Storage (UCS) Forum

Further details about the Technical Committees and Forums can be found on our website – www.eemua.org/tni/About-EEMUA/How-we-do-it/Committees-Forums.aspx.

Support

EEMUA is a growing organisation. The more members we have, the greater becomes our collective influence, and the more EEMUA can accomplish. We believe EEMUA membership sends an important signal that an organisation is committed to high standards of corporate responsibility in the management of its industrial assets.

Email our Head of Membership on membership@eemua.org for further details.

“Promotes high engineering standards within the industry...”

“EEMUA gives the opportunity to get involved in engineering activities on an industry wide basis, helping to promote high engineering standards within the industry and influencing the development of legislation and regulation within the UK and Europe that is practical, fit for purpose and to the benefit of providers and consumers of engineering services and materials in Europe and further afield.”

ExxonMobil

“Brings a wealth of pooled knowledge...”

“What makes EEMUA unique for us is the fact it is for users by users. Being a part of EEMUA allows us to be in at the beginning and influence new initiatives far more than we could achieve as individual companies. You cannot overestimate how beneficial that can be.”

Shell

“Membership is a value added investment...”

“The currency of regulatory compliance, the proportional interpretation of standards and guidance in relation to risk is a key deliverable of our membership commitment.

Proportionate engineering solutions that address the tolerable risk criteria are a valued tool. Membership of EEMUA helps us deliver compliant engineering solutions that satisfy the regulator. Eastman consider their membership of EEMUA as a value add investment.”

Eastman

“The EEMUA Alert is a very powerful tool...”

“Membership of EEMUA is incredible value for money – it’s very easy to be members of EEMUA.”

ScottishPower

“EEMUA closely matches the breadth of our operations ...”

“The scope of EEMUA closely matches the breadth of our operations so we are delighted to take this opportunity not only to learn from others but to help shape guidance with our own experience.”

Calor Gas Ltd
